

Technician's position (Bilbao, Spain)

A technician's position is immediately available in Proteomics Core Facility at CIC bioGUNE, a multidisciplinary research institute in the Technological Park of Bizkaia.

The main duty of the candidate will be to take care of the Differential In-Gel Electrophoresis (DIGE) platform. Thus, proficiency in two-dimensional electrophoresis is required, and some DIGE experience would be an asset. The successful applicant will be also involved in helping in some other ongoing proteomics projects.

Applicants should send their CV by **January 23rd 2009** to rrhh@cicbiogune.es quoting ref. **3522** in the subject line.

In accordance with the Protection of Personal Data statutory law 15/1999 of 13th December 1999, CIC bioGUNE (ASOCIACIÓN CENTRO DE INVESTIGACIÓN COOPERATIVA EN BIOCIENCIAS) will keep your CV on file during a period of two years, to be used in the future selection procedures. You have the right to access the data, to enter corrections or to withdraw your CV, by writing to the Department of Human Resources of CIC bioGUNE, Technological Park of Bizkaia, Ed. 801-A, 48160 Derio (Bizkaia).
