

Proteomika is a pioneering company in the field of functional proteomics with a strong emphasis on innovative R&D and technology development. The company focuses on biomarker identification and the development of protein-based assays for non-invasive diagnosis, prognosis and patient monitoring for human diseases, as well as targeted identification of new therapeutics.

With the aim of strengthening our R&D capacity in European Framework Programmes and other International/National calls, Proteomika seeks candidates for the following position:

## **LEADER FOR EUROPEAN PROJECTS REF.: PTK EU-PROJECT**

Candidates applying to this position must have a Ph.D. in biochemistry, biology, or related field and a strong motivation for working in the framework of international and national multicenter research programmes.

Candidates will work to defined milestones and deadlines, being responsible for laboratory experimental work, project management and reporting, and actively seek and analyse opportunities, as well as setting-up candidate proposals and teams, for collaboration within the applicable R&D research funding programmes.

Work will be developed in the field of biomarker discovery and validation using proteomic approaches, antibody-based techniques and immunoassay development for *in vitro* diagnostic development. Experience in 2D and mass spectrometry techniques and related international and national consortiums is a distinct. High level of spoken and written English is a must.

To apply for this position send your CV with the REF. to:
